### 1. Download the Vizard VR Toolkit Winter Release

- WorldViz is pleased to announce the Winter 2008 release of Vizard R3

This is a free update available to the entire Vizard community. The complete list of enhancements and bug fixes are delivered with this update.

### 2. 27 Speaker Surround Sound Product Release

- WorldViz Spatialized Sound System

The WorldViz Ambisonic Auralizer System is a computer controlled 24 Channel ultra-realistic spatialized surround sound system with integrated low-frequency effects (subwoofers and floorshakers). It creates higher order ambisonic sound spatialization including audio wavefronts with simulated delays, filtering and Doppler shift and generating radiation patterns and reverberation for individual audio sources. It greatly enhances the immersive VR experience and is controlled by Vizard.

### 3. Enroll in a Virtual Reality Development Seminar

- This five-day course, from Monday, July 14 to Friday, July 18, is designed to provide intensive training in the use of immersive virtual environment technology as a tool for research and training. The course is hosted by the University of California, Santa Barbara.

Please view the UCSB web site for more information and online enrollment.

### 4. Visit WorldViz at IEEE VR

- Visit us at IEEE VR, March 8-12, Nevada, USA

Upcoming conference in the fields of virtual environments, augmented reality, and 3D user interfaces.
